Examiner: Choi, Jacob Y.

Title: Method and System for Illumination with a Plurality of Candles

RESPONSE TO OFFICE ACTION

TO THE COMMISSIONER OF PATENTS:

AMENDMENT AND RESPONSE

RECEIVED

MAY 01 2003

TECHNOLOGY CENTER R3700

In the Claims:

1. (Original) An illumination system comprising:

a plurality of first candles, each of the first candles having a first expected burn time; and

a plurality of second candles, each of the second candles having a second expected burn time.

2. (Original) The system of Claim 1, further comprising:

a plurality of third candles, each of the third candles having a third expected burn time.

3. (Original) The system of Claim 2 further comprising a container, and wherein all of the first, second, and third candles are packaged together within the container to be removed prior to lighting.

4. (Original) The system of Claim 3, wherein each of the first, second, and third candles are floating candles.

5. (Original) The system of Claim 3, wherein each of the first, second, and third candles are scented.

6. (Currently Amended) The system of Claim 3, wherein the first burn time is less than about 60 minutes, the second burn time is greater than about 60 minutes and less than about 120 minutes, and the third burn time is greater than about 120 minutes.
